Empathy Map – SB Stocks

Target User

The primary target users are:

- Students.
- Beginner investors.
- Individuals interested in stock markets.
- Users learning portfolio management.
- Users who want to practice stock trading without financial risk.

Says

The user may say:

- "I want to learn stock trading."
- "I am afraid of losing real money."
- "I don't understand how buying and selling stocks works."
- "I want to practice before investing."
- "I want to understand portfolio profit and loss."
- "Stock trading platforms look complicated."
- "I want to analyze stock trends."

Thinks

The user may think:

- Is stock trading difficult?
- What happens after buying a stock?
- How does a portfolio work?
- How are profits and losses calculated?
- Which stocks are performing well?
- Can I test a strategy before using it?
- How can I learn trading without losing money?

Does

The user may:

- Search online for stock market tutorials.
- Watch stock trading videos.

- Explore stock market applications.
- Monitor popular stocks.
- Read basic investment information.
- Create manual lists of stocks.
- Avoid trading because of financial risk.

Feels

The user may feel:

- Curious about the stock market.
- Confused by financial terminology.
- Afraid of financial loss.
- Overwhelmed by complex trading platforms.
- Interested in practical learning.
- Motivated to understand investments.

Pains

The primary user pains include:

- Financial risk.
- Lack of trading experience.
- Complex interfaces.
- Difficulty understanding market trends.
- Lack of practical learning opportunities.
- Difficulty tracking portfolio performance.

Gains

Users expect:

- Risk-free stock trading practice.
- Easy stock exploration.
- Simple portfolio management.
- Clear transaction history.
- Visual stock charts.
- Portfolio profit and loss analysis.
- Strategy testing.
- Improved understanding of stock trading.

Empathy-Based Solution

SB Stocks provides a beginner-friendly paper trading environment that enables users to learn through practical simulation.

The application focuses on simple navigation, virtual funds, clear portfolio information, stock charts, and transaction records.
