Detailed User Journey

Stage 1: Entry

The user visits the SB Stocks web application.

The landing page introduces virtual stock trading and explains the primary features.

Stage 2: Registration

A new user selects Register and provides username, email, password, and contact information.

The system validates the information and creates the user account.

Stage 3: Authentication

The user enters login credentials.

The backend verifies the credentials and provides authenticated access.

Stage 4: Dashboard

The user views virtual balance, portfolios, and recent trading activity.

Stage 5: Stock Exploration

The user browses or searches available stocks.

Stage 6: Stock Analysis

The user selects a stock and views its price, company information, and historical trends.

Stage 7: Trading

The user selects a portfolio and performs a virtual buy or sell operation.

Stage 8: Portfolio Monitoring

The user views holdings, invested value, current value, and profit or loss.

Stage 9: History and Analysis

The user reviews previous transactions and analyzes historical stock performance.

Stage 10: Logout

The user securely ends the application session.
